Introduction

The following Charging Statement sets out the principles and methods used to determine charges for Gas Distribution Connection Services. This applies to individual connections to an **existing Domestic Property** (Annual Consumption Under 73,200 kWh's per annum) located within 23 metres of an Indigo Pipelines Limited main, as per our Gas Transporters Licence Condition 4b.

The operation of Indigo Pipelines' network assets has been contracted to SSE Enterprise Utilities, a trading name of SSE Utility Solutions Ltd, part of SSE plc. SSE is a major utility with many years of experience building and operating public gas networks.

Indigo Pipelines aims to recover those costs it reasonably expects to incur when we provide connection services via our contractor SSE Enterprise Utilities. Charges reflect the cost of labour, materials and any other expenses required to carry out the work of the customers' requirements. Each cost element will include an appropriate level of overhead.

Important Information

This Connections Charging Statement replaces any statement previously published by Indigo Pipelines under its current or former name of SSE Pipelines Limited.

The following types of connections to an Indigo pipelines network will be quoted on a case by case basis by SSE Enterprise Utilities:

- Industrial & Commercial Connections
- Multi-Site Connections
- Connection to a New Build Domestic property
- Connection from an Intermediate or Medium Pressure Indigo Pipelines network*
- Applications from Housing Developers, Agents or Landlords**

* To find out the pressure type of your nearest Indigo Pipelines network or if you have any questions regarding a connection to our network, please refer to the *Contacting Us* section of this leaflet.

** Evidence in respect of the identification of the person who owns / occupies a premise may be required.

All Connections are quoted **without** the provision of a meter. To allow gas to flow a gas meter must be installed. To arrange the installation of a gas meter you must appoint a licensed Gas Supplier, you can obtain a list of Licensed Gas Suppliers by contacting Ofgem.

Quotations are provided based on information supplied by the requestor; if this information is found to be incorrect, Indigo Pipelines reserves the right to make an additional charge for the inaccuracy.

Connections for Fuel Poor Customers

The Fuel Poor Network Extension Scheme is delivered by Gas Transporters in partnership with other organisations. It aims to help vulnerable and fuel poor households switch to a natural gas or heat network to heat their homes. The scheme provides funding to eligible households which helps cover the costs of connecting to a gas or heat network.

Eligible customers that can qualify for the fuel poor discount scheme are those that:

- Reside within the 25% most deprived areas, as measured by the Government's Index of Multiple Deprivation (IMD); or
- are eligible for support under Home Heating Cost Reduction Obligation in England, Wales and Scotland Nest in Wales or the Home Energy Efficiency Programmes in Scotland; or
- You must be in fuel poverty based on the latest government definition or indicator, currently:
 - In England, the Low Income High Cost Indicator where a household's income is below the poverty line (taking into account energy costs) and its energy costs are higher than is typical for its household type
 - In Scotland and Wales, a household spends more than 10% of disposable income on all household fuel use

If you think you may be eligible for funding, please contact us. We will use the Ofgem voucher calculator to assess the voucher value available to you. In most cases, the voucher will cover the cost of the connection, however, if the cost of the work required to make the connection is greater than the voucher value, you will be required to contribute.
